## Why Kidney Disease is Dangerous.

Kidney disease is dangerous because it comes on unawares and progresses to a fatal stage before the sufferer realizes what the trouble is.

If you begin to run down, feel badly, have indigestion, inactive liver, etc., you have reason to suspect that your kidneys are affected and a special Kidney treatment should be taken at once. Kidneys are dangerous. KIDNEY'S KIDNEY REMEDY is the best remedy known for the kidneys. It never fails to restore them to health. KIDNEY'S KIDNEY REMEDY will cure Bright's Disease if taken before too much of the kidneys are destroyed. The Remedy can do no harm if your kidneys are not the cause of your illness. It is the safest remedy if they are the cause. Put up in pill form in 25c. and 50c. sizes. F. D. Pierce, Barton; F. J. K. O'Neil, Orleans.
